

Why can't I get pregnant?

Achieving a pregnancy is a complex process involving many factors, some external and others connected with the woman herself.

Getting pregnant is not that easy

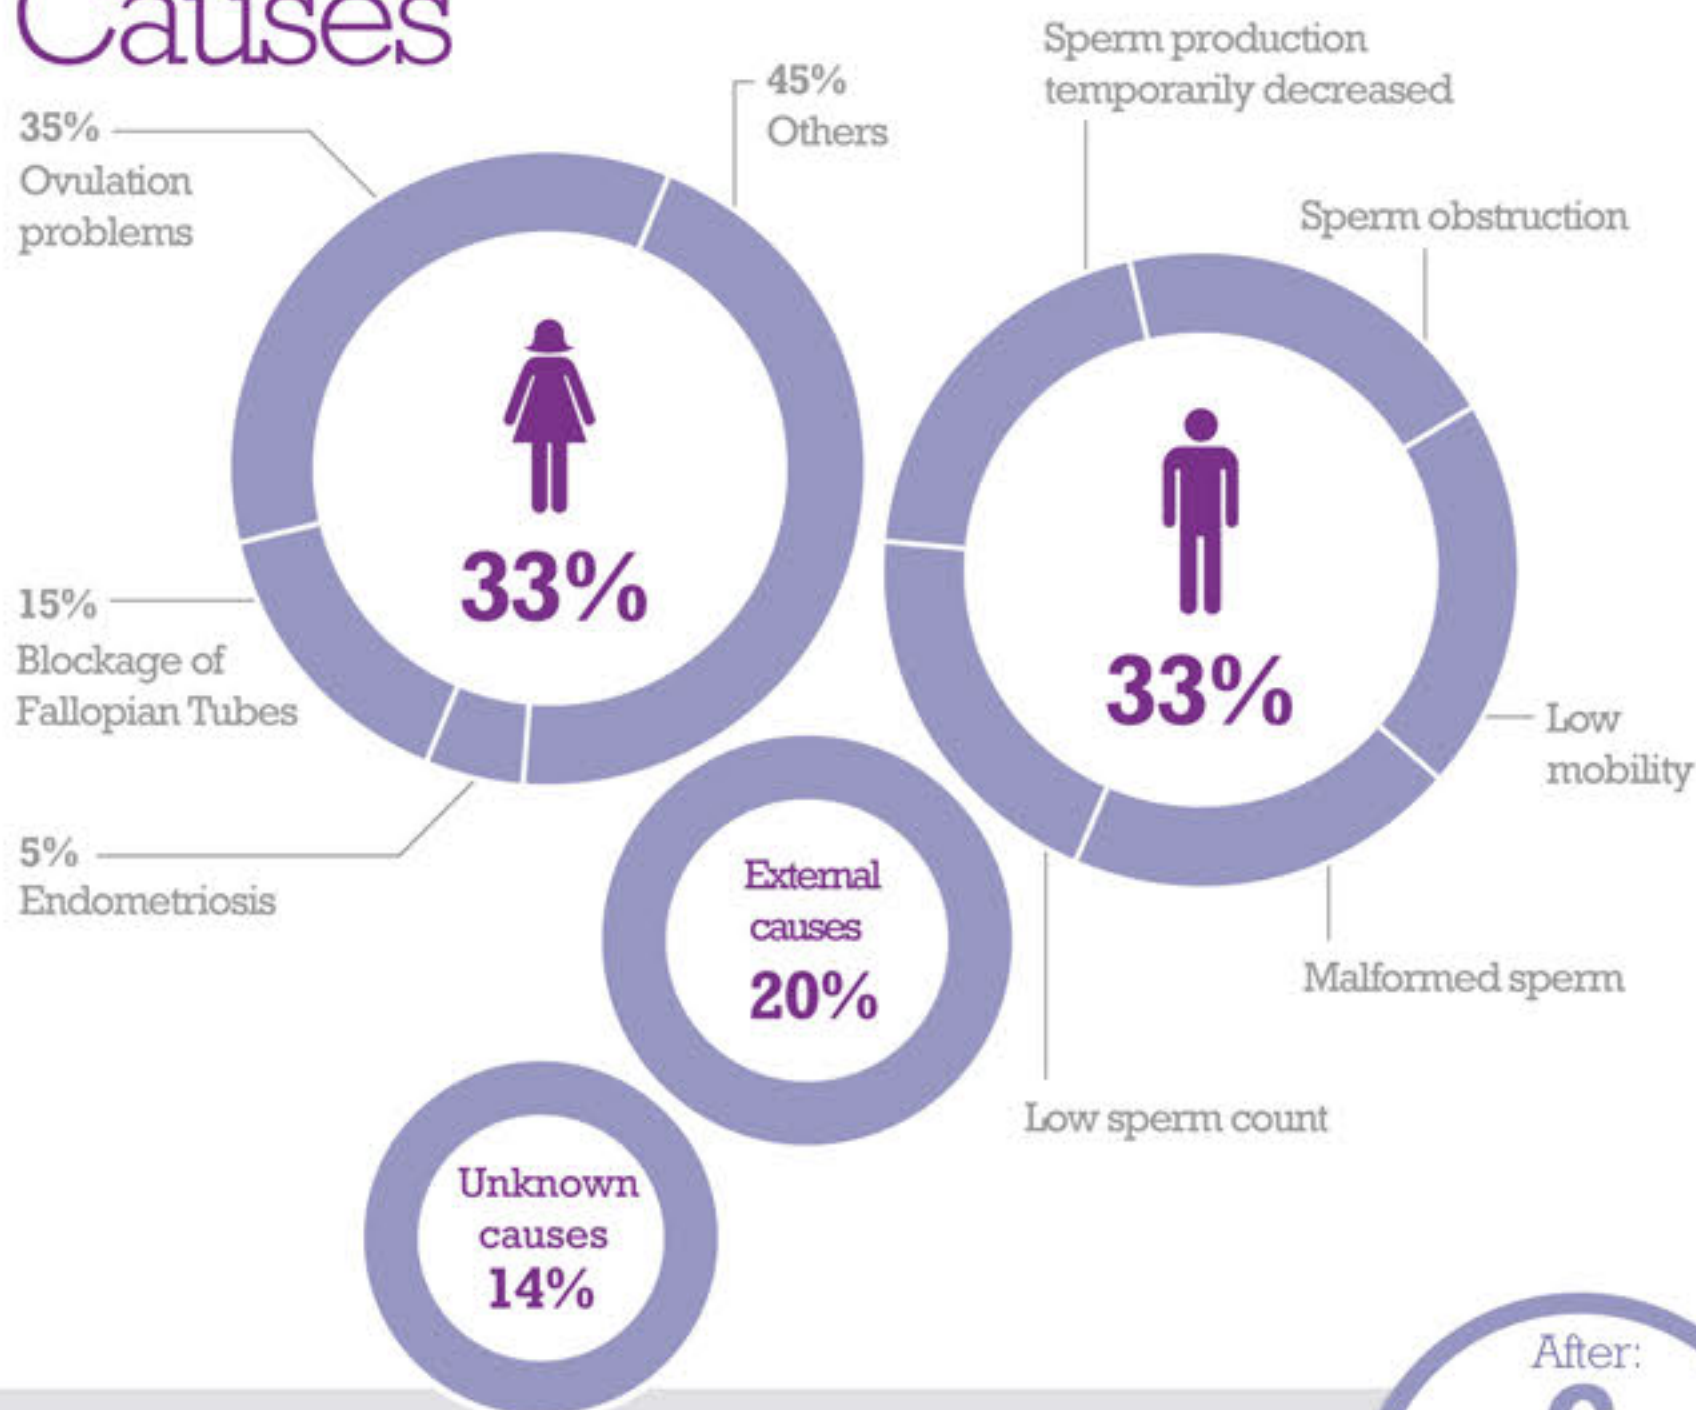

Fewer options as you get older

It is not unusual to have problems

Causes

When to ask for help?

Thousands of women with problems have managed to become mothers

If you are trying to get pregnant for over one year (6 months if you are older than 35), we recommend that you visit your doctor to diagnose the cause.

In our website, within 2 minutes you can obtain a pre-diagnosis on-line, personalised to your needs and is free and non-obligatory.
